# Fixing Guide INTRAD BHL-100

# **General Information**

INTRAD materials should be stored flat and protected against damage. Allow 24 hours for materials to reach ambient room temperature.

## STEP1

Mark out wall at required height.

# STEP 2

Drill the aluminium at 600mm centres and use as a template to mark the wall for drilling.

#### STEP 3

Select the correct fixings for the wall construction and drill the wall accordingly

# STEP 4

Fix the end caps to the aluminum core with self tapping screws. Fix from the back inwards.

## STEP 5

Fix the bed head buffer to the wall. Ensure the location groves of the aluminum core and spacer block line up correctly

# STEP 7

STEP 6

Snap the high impact cover onto the aluminium.

NB: For General guidance only. Specific site conditions must prevail.

Clip in the impact absorber
