

Specification

INTRAD BHB-100

Product Description

Ideal protection from bed damage especially where height adjustable beds need to move without impacting the walls or medical equipment.

By installing INTRAD BHB-100 vertically behind and/or to the side of a bed offers protection to the walls around the bed as well as expensive medical gas or electrical supplies.

INTRAD BHB-100 is supplied as a complete kit of two 1 metre buffers comprising cover, aluminium core, impact absorber, end cap and spacers.

Product Reference

INTRAD BHB-100, comprising of a continuous aluminium core & impact absorber, cover and spacers.

NBS
