

Specification INTRAD BHB-125

Product Description

A pair of buffers designed for vertical installation onto walls at bed head positions where heavy duty protection is required from height adjustable beds, or extra projection is required to help protect trunking systems.

INTRAD BHB-125 projects 95mm from the wall offering greater clearance to vulnerable medical services.

INTRAD BHB-125 is supplied as a complete kit of two 1 metre buffers comprising cover, aluminium core, impact absorber, end cap and spacers.

Product Reference

INTRAD BHB-125, comprising of a continuous aluminium core & impact absorber, cover and spacers.

NBS

P20/178A proprietary vertical bed head protection.

Size

125(H) x 96(D) mm
