

Specification INTRAD RA2 (Option 01)

Product Description

Comprising of a textured PVC-U cover section with plastic brackets, INTRAD RA2 (Option 01) is a mid level, light to medium duty, PVC-U, 200mm high crash-rail system, designed to protect walls and other vulnerable interior surfaces against damage caused by impact and wear.

With a 30mm projection and plastic brackets placed at 500mm centres, INTRAD RA2 (Option 01) is ideal for use in minor treatment rooms, waiting areas, general corridors, consulting rooms & equipment bays etc.
