

Specification

INTRAD RA2 (Option 05)

Product Description

Comprising of a textured PVC-U cover section with continuous aluminium core, a continuous single impact cushion and conical spacers, INTRAD RA2 (Option 05) is a mid level, heavy duty, PVC-U, 200mm high crash-rail system, designed to protect walls and other vulnerable interior surfaces against damage where there is a requirement for extra wall clearance.

With a 75mm projection and continuous aluminium core, INTRAD RA2 (Option 05) is ideal for use in circulation areas, wheelchair damage, kitchen corridors, trolley stores, staff base & goods in etc. The continuous aluminium core also increases impact resistance to light weight wall structures.
