

Specification INTRAD RCR-125

Product Description

A combined hand and crash-rail system in a compact and integrated design. INTRAD RCR-125 combines a smooth handgrip, embossed impact zone (to give increased durability) and both tactile end and corner mouldings for the visually impaired.

INTRAD RCR-125 is an ergonomic handrail, providing a comfortable and secure handgrip whilst the robust design is capable of withstanding impact and wear experienced from main corridors.
