

Specification INTRAD RCR-200

Product Description

A combined hand and crash-rail system for heavy traffic areas. INTRAD RCR-200 combines a warm touch handrail, décor strip (supplied in the same or contrasting colours), a high impact crash rail and both tactile end and corner mouldings for the visually impaired.

INTRAD RCR-200 has been developed and designed to fulfil a unique combination of functions. It is an ergonomic handrail, providing a comfortable and secure handgrip. It will withstand impact and wear to prolong and protect your interiors from damage and wear.
