

# Specification INTRAD RHB-100

## Product Description

The practical contoured PVC-U cover profile engages over a rigid aluminium core incorporating a resilient impact absorber, and is mounted on spacers. The result is a combination of strength and resilience. The aluminium core imparts rigidity, while the resilient shock absorber and spacers reduce the force of impact.

Whilst primarily used as a low level protection, INTRAD RHB-100 can be used at mid height or in horizontal pairs.

## Product Reference

INTRAD RHB-100, comprising of a continuous aluminium core & impact absorber, cover and spacers.

## Colour/Finish

To be selected from the manufacturer's available colour range. Embossed PVC-U profile and mouldings.

## NBS

P20/173 proprietary horizontal buffer system.

## Accessories

End Stop  
90° Corner Angle

## Size

100(H) x 62(D) mm

## Manufacturer

PJP Limited, 184 St. Albans Road West, Hatfield, Hertfordshire, AL10 0TF, United Kingdom.

## Impact Rating

Medium to Heavy Duty
