

Specification INTRAD RS (for Door Protection)

Product Description

To be read in conjunction with INTRAD RS Specification.

Doors receive a lot of use and can suffer from excessive damage. INTRAD RS is ideal for use as door protection.

INTRAD RS can be cut into push plates, kick plates (low level & between vision panels), half height crash plates (square or contoured) or full height cladding.

It can be thermoformed around door frames to provide complete protection if desired.
