

Specification INTRAD RA2 (Option 02)

Product Description

Comprising of a textured PVC-U cover section with aluminium brackets and a continuous single impact cushion, INTRAD RA2 (Option 02) is a mid level, medium to heavy duty, PVC-U, 200mm high crash-rail system, designed to protect walls and other vulnerable interior surfaces against damage caused by moving equipment.

With a 30mm projection and aluminium brackets placed at 500mm centres, INTRAD RA2 (Option 02) is ideal for use in major treatment rooms, general corridors, ward corridors, utility rooms, examination rooms & dining rooms etc.
