

Specification INTRAD RA2 (Option 03)

Product Description

Comprising of a textured PVC-U cover section with continuous aluminium core and a continuous single impact cushion, INTRAD RA2 (Option 03) is a mid level, heavy duty, PVC-U, 200mm high crash-rail system, designed to protect walls and other vulnerable interior surfaces against damage caused by impact from trolleys, beds and similar mobile equipment.

With a 30mm projection and continuous aluminium core, INTRAD RA2 (Option 03) is ideal for use in main circulation areas, wheelchair damage zones, kitchen corridors, trolley stores, staff base & goods in etc. The continuous aluminium core also increases impact resistance to light weight wall structures.
